PROJECTS

Calorie App Android, Java

05/2018 – 06/2018

Achievements/Tasks

- In this android application we set our fitness goal by giving details such as height, weight and date of birth. We used pedometer as unique feature for step count. Our app also supports food delivery services.

Team: Visesh Thakur, Kamal Naidu –
viseshthakur@gmail.com, kamalapurva@gmail.com

Plagiarism Java, Python

08/2017 – 09/2017

Achievements/Tasks

- Plagiarism is the act of presenting the words, ideas, images, sounds or the creative expression of others as your own. It detects the files which have similar text. Scope of this project is limited to text documents, and focuses on local similarities including fingerprinting, term occurrence analysis.

Multi Face Recognition System .Net, PCA

02/2016 – 04/2016

Achievements/Tasks

- This project is built for marking the attendance automatically by detecting the faces of students when they enter the class. We can avoid proxy problems and the lecturers can also concentrate on class without any disturbance. We save the images of the students in a data base and then whenever students enter the class their faces get detected and the images get matched and then the attendance is marked.
